Alarms*

Grab 'n Go Digital

PORTABLE MEDICAL OXYGEN SYSTEM NOW INCLUDES AUDIBLE AND VISIBLE ALARMS

Game-changer.

That's an accurate way to describe the Grab 'n Go portable medical oxygen system we introduced a few years back. At Praxair, we're proud to have helped pioneer that ground-breaking innovation.

And now, with the introduction of the Praxair Grab 'n Go Digital Advanced Oxygen System, the game has changed again.

The Praxair Grab 'n Go Digital, a portable medical oxygen system, now features audible and visual alarms.

You can use the system with confidence knowing there is an alarm that will activate if the cylinder pressure drops below 300 psig.

With the Praxair Grab 'n Go Digital System:

YOUR STAFF will be focused on patient care because the new Praxair Grab 'n Go Digital continually monitors cylinder content and converts it into a "time remaining" display of available oxygen.

YOUR HOSPITAL will be more efficient because eliminating your staff's need to estimate oxygen supply based on transport time, helps to eliminate human error.

PRAXAIR GRAB ADVANCED

Domamid Shroud and Convenient Carrying Handle

The shroud is constructed from rugged Domamid to help protect the regulator and meets ISO 11117 Drop Test requirements.

Audible and Visible Alarms

In addition to a back light and color-coded display for assessment of contents, audible and visual alarms alert you to when it is time to switch to another full system.

Digital Display includes Auto-Calculator

This quick-read feature provides alternating cylinder contents pressure — and “oxygen time remaining” regardless of flow-rate.

'N GO DIGITAL OXYGEN SYSTEM

MORE FEATURES TO BENEFIT YOUR PATIENTS— AND YOUR FACILITY

Snap-Set Flow Meter

Snap-set flow-adjusting control knob allows you to control oxygen flow at most frequently prescribed settings.

Flow Rates 0.5, 1, 1.5, 2, 3, 4, 6, 8, 10, 15, 25

Integrated Regulator

Machined from solid brass for high quality, the integrated regulator means there is no equipment to attach.

MRI Compatible Design

Certified MRI conditional up to 3 Tesla when cylinder located outside the MR bore.

Choice of Sizes

Available on aluminum cylinders in the standard AE size and smaller AD size.

Simplified Inventory Management

No more regulators and flowmeters to administer transport oxygen because everything you need is built in and maintained by Praxair.
