

Double Jointing Fit-Up Rolls

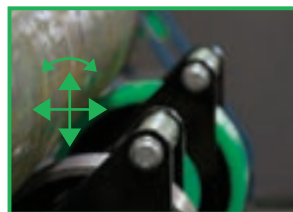

ProStar™ double jointing fit-up rolls are a turnkey system designed to maximize productivity. Complete pipe handling and welding automation functionality is fully integrated into a single user-friendly system. The result is up to a 65% decrease in cycle times for double jointing and pipe welding applications.

**PLUG AND PLAY WITH SAW MANIPULATORS
FOR MAXIMUM THROUGHPUT**

Fully Automated Pipe Joining Systems

Pipe loaded, lined up using track drive.

Alignment, side shift, and leveling functionality.

Available with fully integrated subarc manipulator or robotic welding systems.

Optional Tailstock system available for adding flanges or end caps.
