

Enhanced Welding Performance, Productivity And More

When you want to ensure precision high-quality welds in the most pressing environments, you want Praxair[®] HeliStar[™] helium-enhanced shielding gases. These helium-enhanced blends are available in a variety of precise formulations. That means there's a Praxair HeliStar gas blend to meet your specific Gas Metal Arc Welding (GMAW or MIG/MAG), Gas Tungsten Arc Welding (GTAW), Plasma Arc Welding (PAW) and Laser welding applications.

Who Benefits From Using Praxair HeliStar Helium-Enhanced Blends?

Anyone who welds a broad range of ferrous (steel, stainless) and non-ferrous (aluminum, copper, etc.) materials...shielding gas users with pulse welding capabilities...auto repair shops (aluminum panels)...and manufacturers of:

- Carbon, stainless steel and aluminum tanks
- Transformers (copper windings)
- Stainless steel components
- Aluminum truck bodies
- Boats
- Monel piping

What Do They Say About Praxair HeliStar Helium-Enhanced Blends?

Users report greater speed, reduced costs, lower reject rates, increased production rates, elimination of surface porosity, better weld quality, fewer weld failures and improved penetration profile.

- Praxair HeliStar blends increase the travel speed of welding dramatically, making them ideal for piece work, robotic systems and production applications.
- Better toe wetting and deeper root penetration add to the overall higher weld quality.
 A wider range of operating parameters is available with Praxair HeliStar blends.
- Praxair HeliStar blends produce strong welds which perform better than pure argon over minor surface contamination.

The Praxair Difference

Comprehensive, High-Quality Product Line

A full range of pure gases, mixtures, gas handling equipment, supply systems and related products and services.

Application-Based Solutions

Sales, production and research capabilities to supply you with the technical solution that best suits your needs around the world.

Reliable Production And Distribution Network

Production plants and more than 600 distribution locations in North America — all serving you with the gases you need, when and where you need them.

Outstanding Technical Support

A highly trained team of field sales representatives, shielding gases engineers and technical service personnel work in concert with dedicated market specialists to quickly provide the guidance and cost-effective solutions you deserve.

Global Supplier

Production, distribution and application technology in over 40 countries.

Praxair HeliStar Family Of Helium-Enhanced Blends

- Helium/Argon
- Praxair HeliStar A-25, A-50 and A-75
- Helium/Argon/Carbon Dioxide
- Praxair HeliStar A-1025, CS and SS

Praxair Star[™] Gases And Blends

Why rely on anything less than the most advanced shielding gases available? Praxair Star[™] gases and blends are ideally suited to the most challenging Gas Metal Arc Welding (GMAW or MIG/MAG), Gas Tungsten Arc Welding (GTAW or TIG), Flux-Cored Arc Welding (FCAW), Plasma (PAC, PAG, PAW) and Laser applications, including:

- Praxair StarGold[™] Gases Argon-based blends for general fabrication of mild steel.
- Praxair Stargon[™] Blend The standard for versatile high-speed welding of mild steel.
- Praxair Mig Mix Gold[™] Blend High-productivity mild steel welding.
- Praxair HeliStar[™] Gases Helium-enhanced blends for increased productivity on stainless steel, aluminum, copper and some carbon steel welding applications.
- Praxair HydroStar[™] Gases Hydrogen-enhanced blends for increased productivity during GTAW, plasma welding, gouging and cutting of stainless steel.
- Praxair LaserStar[™] Gases Enhanced quality and purity to meet demanding laser needs.
